**Spectrum bespoke etched glass designs**  
*"a contemporary alternative to textured glass"*

**Technical -**

The design is permanently etched onto the inside surface of the glass using CNC controlled oxide grit blasting machinery.

A range of digitised fonts/ typefaces are available.

Sealed units can be toughened as required.

A full range of low e glasses are available including spacer bar options / colours / warm edge and argon gas filling an option.

All units certified to current standards.
